

Our goal and mission is to establish long term partnerships and deliver results through personal relationships. Through this commitment NES has successfully executed rapid start-ups throughout the nation over the last few years.

Seamless transitions and success with new partnership start-ups are driven by NES' operations and support teams ability to collaborate with hospital leadership and clinical management on a personal level.

*"This was the smoothest ED transition I've experienced in my career"*

- Spiros Haitaris, CEO  
Holyoke Medical Center, MA
